Net Paste Stone

网贴

网贴

网贴石是由天然石材生产，是硬度、耐久性、优异性能和自然美的结合。适用于户外天井、走廊、露台、凉亭、车道、人行道或公共建筑。因为它的灵活多样而被房主，承包商和建筑师所喜爱。广泛应用于住宅和商业用途。

Net Paste Stone

Net paste stone is produced by natural stone, which is a combination of hardness, durability, excellent performance and natural beauty. Applied to outdoor patios, porches, terraces, pavilions, driveways, walkways or any public building. Favorite by homeowners, contractors and architects because of its flexibility. Be widely used in both residential and commercial applications.

Dry Stack Stone

散石

散石

散石又叫城堡石，可以由不同石材构成。通常用于建筑墙面装饰以及花园墙面，安装时直接用水泥粘贴，为了达到不同的装修效果，石块形状以及石块之间是否留有缝隙很重要，同时，水泥颜色可以衬托石材的颜色。由于迎合了西方文化，散石在西方国家非常盛行。

Dry Stack Stone

Dry stack stone is also named castle stone, could be made of different materials. It is always used in building walls or garden walls pasting to concrete without restriction, because it is stable and irregular. In order to realize different decorate effect, stone shape, installed with gaps or not is very important, and cement in different colors can set off the color of stones.

It is very popular in western countries because it caters to the culture of freedom.

Cement Back Wall Stone Panels 水泥文化石

水泥文化石

水泥文化石的表面比较粗狂，古朴。石材的背面由一层水泥覆盖以确保其更加结实。更适用于户外，安装方便，节省人工。由于产品厚度较厚，在气候严寒地区市场广阔。如今，我们开发了新样式：石材背面粘有塑料网已经石材背面粘有铁丝网。重量减轻和样式更加自然是其特点。

欢迎大家垂询！

Cement Back Wall Stone Panels

The surface of cement stone panel is in rough surface. The back is covered with cement to ensure its strength. More suitable for outdoor and easy to be installed, it saves much labor cost. It is very popular in cold weather places because of the thickness. Now, we develop new patterns: stone panels with plastic mesh backing and stone panels with iron mesh backing. The light weight and more natural effect are the advantages.

Cement Back Wall Stone Panels

水泥文化石

Before installing the panel, the hook must be already placed like it is shown below:

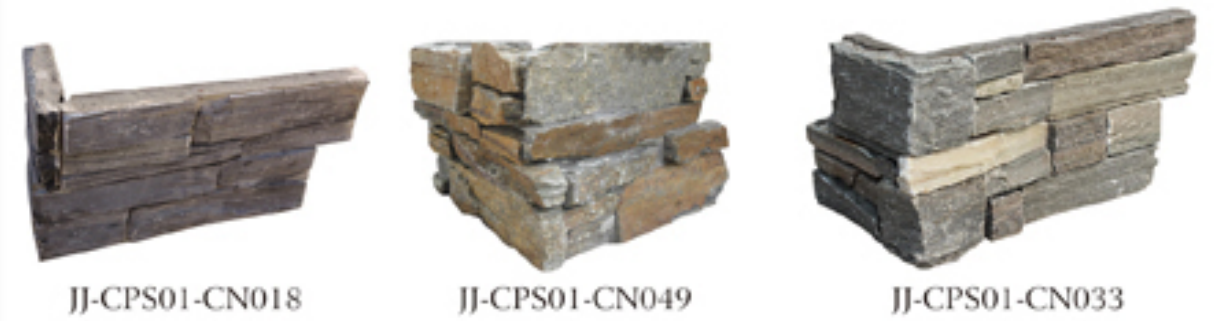

Once the hook is placed, it must be bent forward.

Insert the plug and stainless steel screw into the drilled hole. Stone panel is fixed to the wall in seconds using an electric screwdriver.

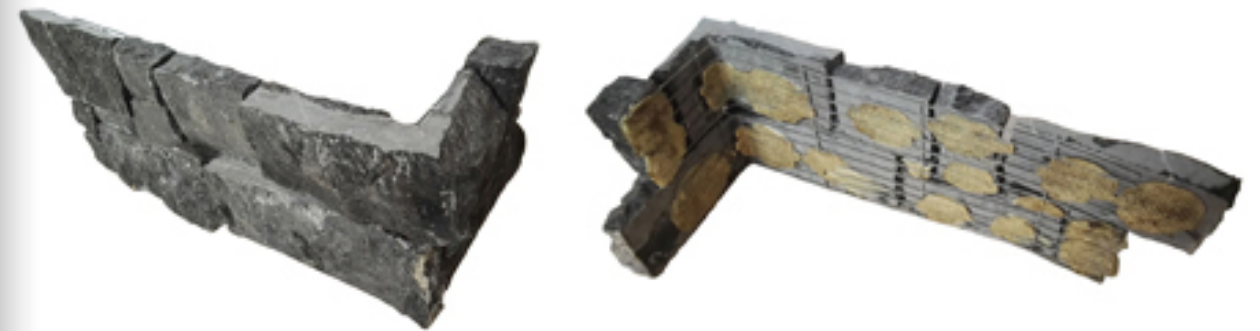

Starting the installation of the next row of the panel the mortar adhesive is applied on the wall. It completely covers the perforated banding; it does not affect the fixing of the next row of panels.

Water stone

Our waterfall stones are made from slate. They are good materials for artificial fountains and waterfalls. When water streams down, you can nearly hear soft music, but not noisy, as if you stay near sequestered brook in the dense forest.
