Company Profiles-Certificates

CE&GHOST certification

Quality, environmental, occupational health and safety management certification

Registered Brand

Product System- Steel Structure

**Welding BH& hot rolling
H type structure**

**Cross type/well type
steel structure**

**BOX type column
structure**

**Pipe truss type
structure**

Tube column structure

Network structure

Grid structure

deformed steel structure

Product System- Steel Structure Processing

Advanced high-pressure airless spraying technology with high spray efficiency. Spraying coating is smooth, bright and densification. Extend coating life-span. Avoid corner, voids, and sags and crests area.

10 shot blasting heads stereo cleaning. Welding slag and oxide skin of surface corrosion layer fall off quickly, can reach Sa2.5 Class. Enhance surface adhesion and anti-corrosion ability, extend life span.

As for all structures, we use all-NC pre-drilling. We ensure the accuracy of pitch-spacing can reach $\pm 0.5\text{mm}$.

Mix Gas Rich Argon Shielding Arc Welding with great profile, little splash. Welding deformation correction can achieve 80mm thickness(max).

Automatic welding with Lincoln double head single wire or double wire submerged arc. Ensure welding quality and complete penetration.

Integrated with erection and welding, we reduce the process and improve the productivity. Enhance the position accuracy with centering mode of the two groups around.

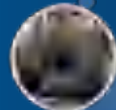

Cutting method of NC multi-head flame and NC plasma cutting. Cutting with fast speed, high-quality, can ensure welding quality, reduce deformation and remain stress.

Airless Spraying

Shot Blasting Redust

Product System- Steel Structure Model

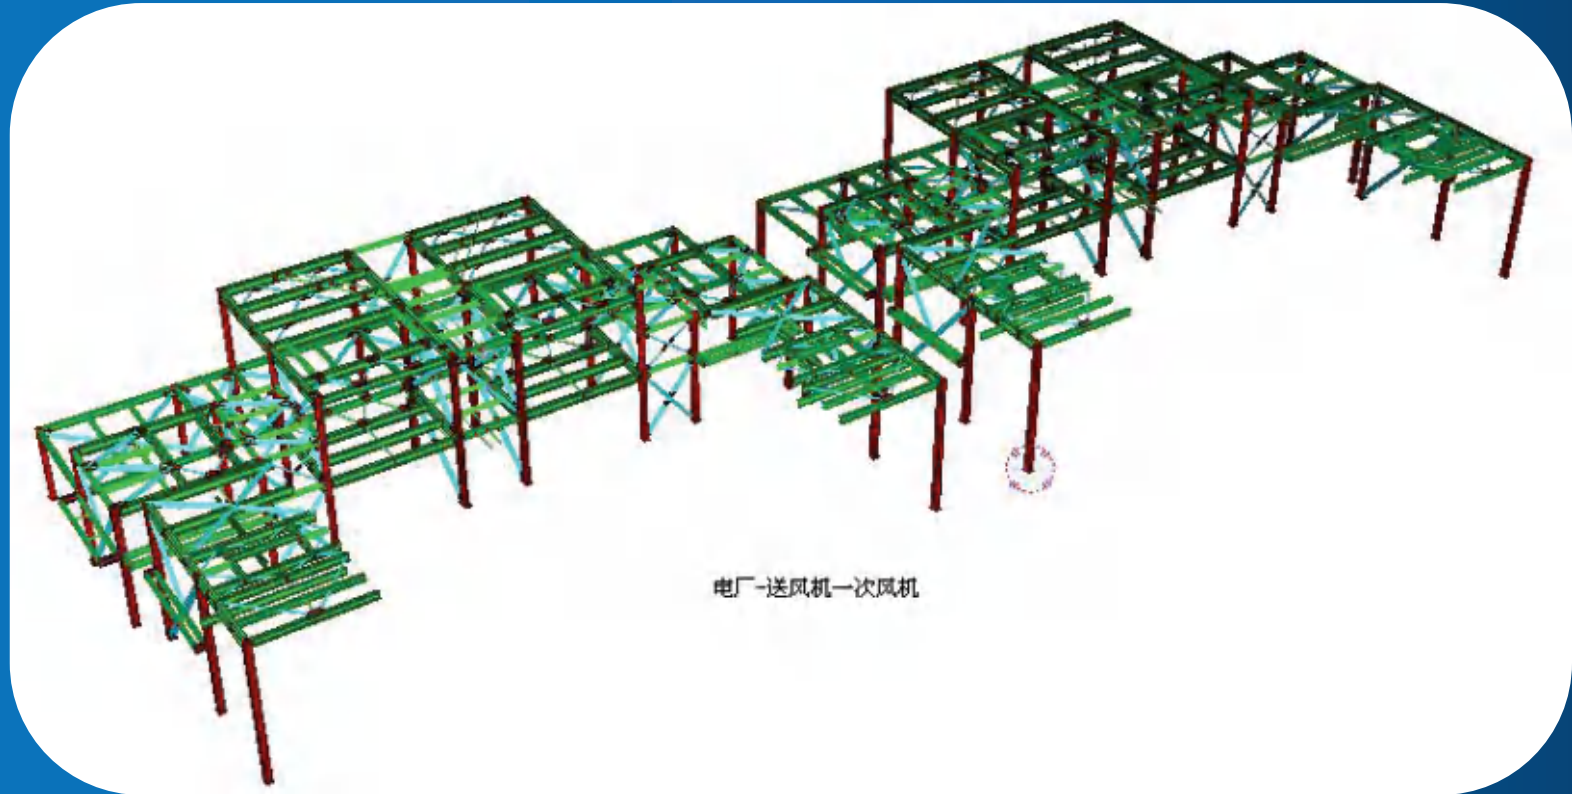

Power plant model

Product System- Steel Structure Model

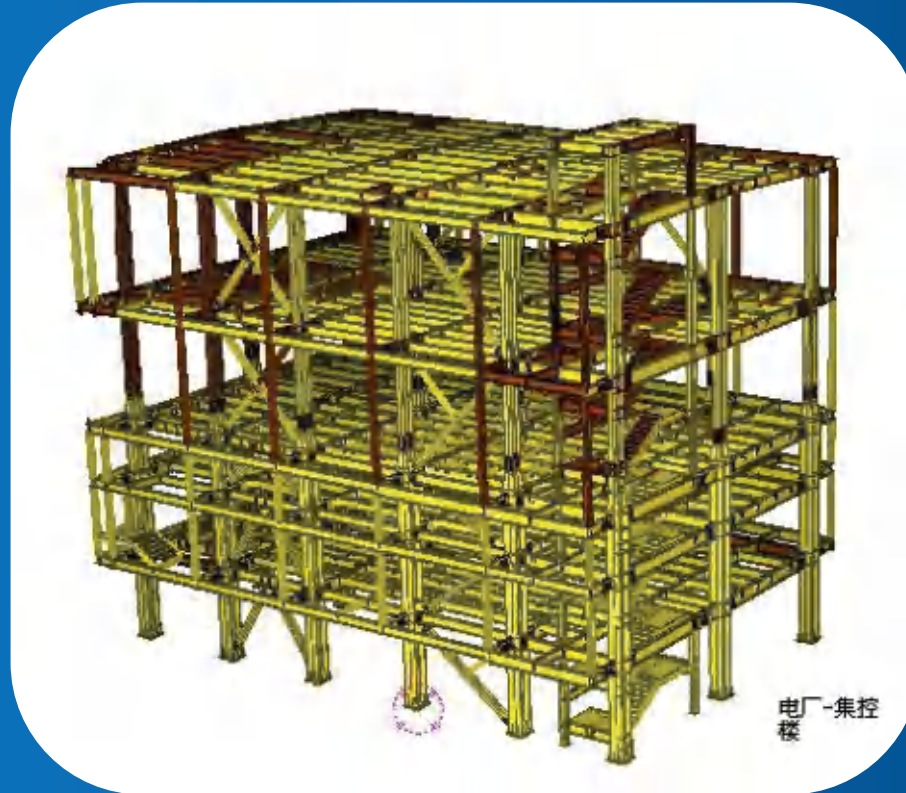

Air-cooled island model picture

Product System- Steel Structure Model

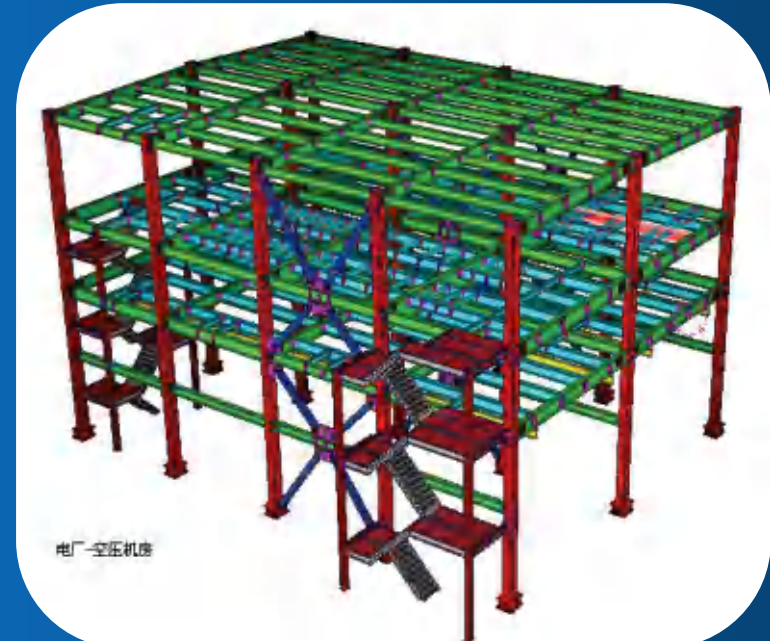

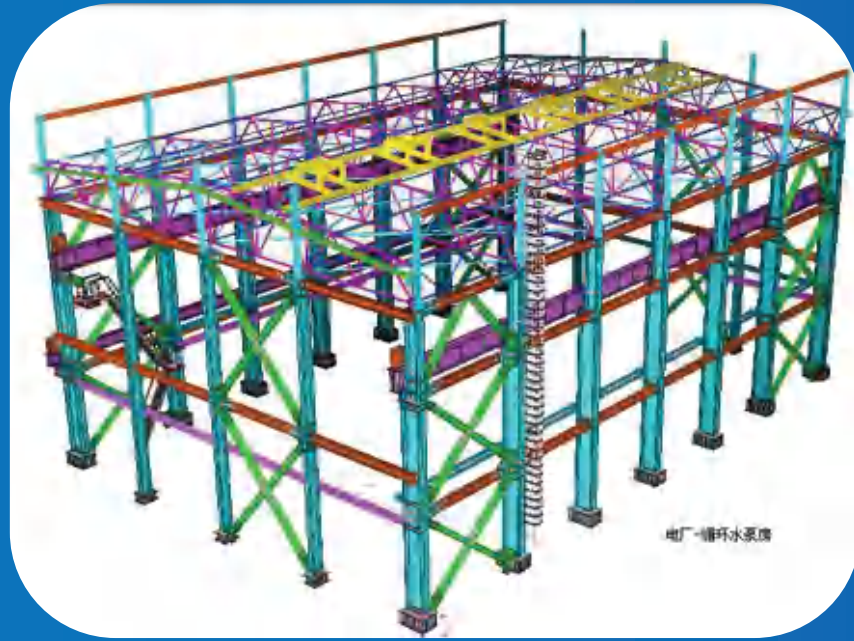

Blower model

Product System- Steel Structure Model

Integrated control building model

Product System- Steel Structure Model

Circulating pump room, air compressor room model

Product System- Steel Structure Application

The 2*300MW air-cooling steel structure platform

Product System- Steel Structure Application

the main workshop steel structure project of 2*150wm coal fired power plant in Sumsel, Indonesia

Product System- Steel Structure Application

4*150wm coal-fired power plant project in Botswana

Product System- Steel Structure Application

2*630wm fuel gas power plant project in salah al-din Iraq

Product System- Steel Structure Application

Venezuela project

Product System- Steel Structure Application

**525KV transformer
substation of NJ
water power plant in
Pakistan**

Product System- Steel Structure Application

Laos Hongsa project

Advantages-Equipment-Light Steel Structure Line

Precision of the
frame can reach
to $\pm 0.5\text{mm}$

Projects Show

East Airlines maintenance area of Beijing New Airport

Projects Show

East Airlines maintenance area of Beijing New Airport

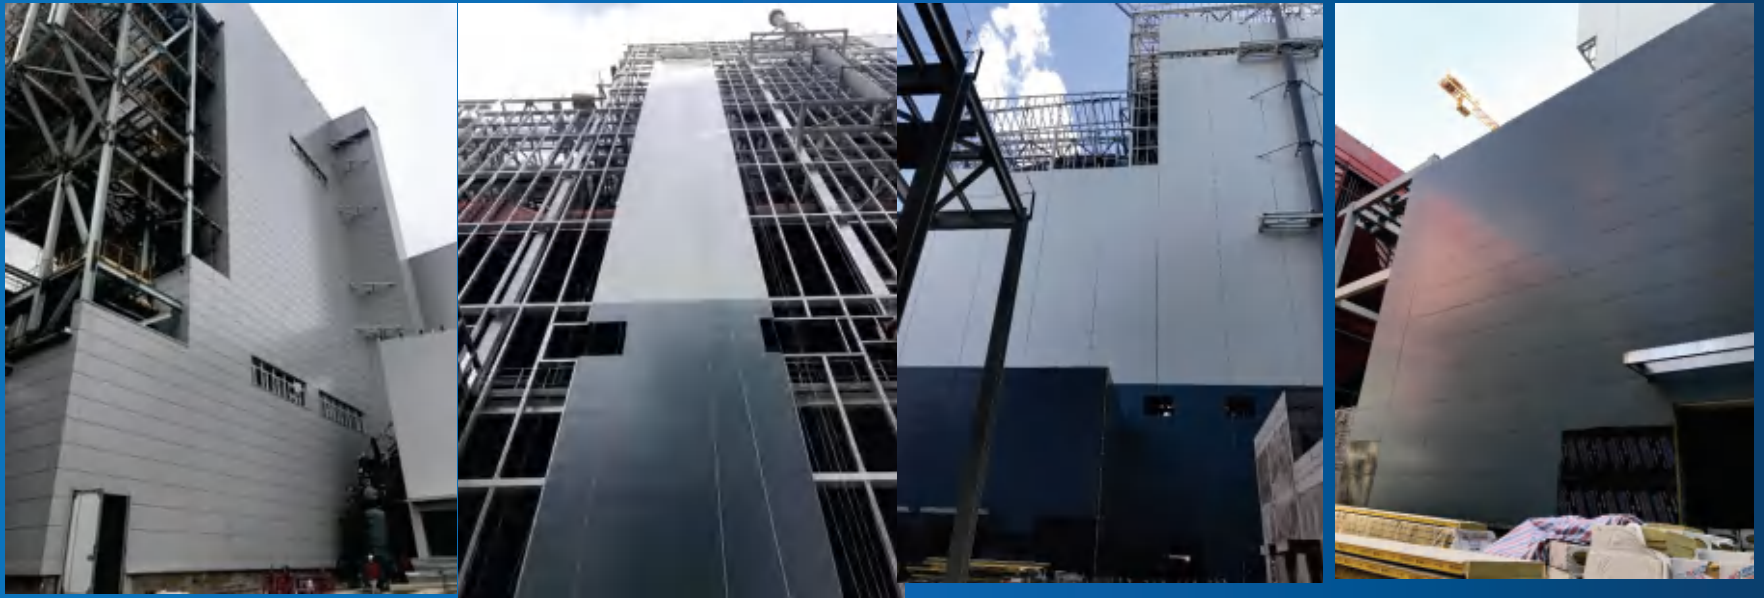

Projects Show

Steel structure roof and canopy engineering of Beijing new airport freight station

Projects Show

2 * 1000MW Supercritical Power Plant Phase III expansion project

Projects Show

Shenhua Fuping 2 * 660MW power plant project

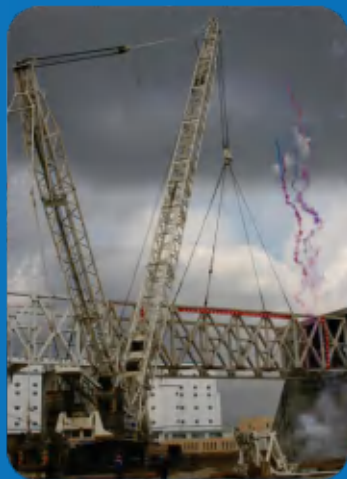

Projects Show

Ammonia and urea project of Ningxia Jiemei
Fengyou Chemical Co., Ltd

Projects Show

The steel structure of raw coal silo, product warehouse, machine repair workshop and the whole plant profiled steel sheet sealing project of Pingshuo east open pit coal preparation plant of China Coal Group

National Quality Project (Luban Award)

High quality project in coal industry (Sun cup)

长雄杯

太阳杯

Projects Show

Laos hongsa power plant project

Projects Show

Power plant in Kostolac Serbia

Projects Show

The steel structure project of 3*330WM power plant in Indonesia

Projects Show

The steel structure project for main workshop and trestle bridge in SASAN India

Projects Show

Shanxi Guofeng coal electrical 2x300WM
power plant project

Thanks
